DEKA-PermMetallic The shimmering metallic fabric paint

Let your imagination run free with DEKA-PermMetallic. Put your own creative ideas to work. Magically transfer stylish accents or designs onto festive table decor. Decorate your accessories (cotton bags, fabric belts, scarfs, ties, hairbands, spectacle cases), blouses and T-shirts. Everything that looks plain you can dress up excitingly with DEKA-PermMetallic. DEKA-PermMetallic, the fabric paint with a shimmering metallic effect for light and dark-coloured fabrics, is especially suitable for painting, printing and stenciling. You can draw the desired design onto tracing paper with the DEKA-Transfer Pencil, easily transfer it onto the fabric and then paint it with DEKA-PermMetallic - and your own personal creation is finished! You can find many attractive designs in our DEKA-Patterns.

Features:

Soft to the touch; vibrant, intense colours; very opaque; lightfast; washfast up to 30°C; blendable; easy-to-use and waterbased, of course!

Directions:

Stir DEKA-PermMetallic well before using. Use only fabrics free of sizing (fabric softener is also a form of sizing!). In order to completely remove sizing, DEKA-TextilFit is recommended. Use a piece of cardboard as backing under the fabric (between front and back of a T-shirt), since the paint application can bleed through. Apply DEKA-PermMetallic evenly with a brush. Avoid applying thick or multiple coats that could affect washfastness. Lighter pastel shades can be achieved by adding metallic White No. 21-92. It is advisable to test and wash the paint on a sample, since all fabrics have individual characteristics. Brushes, stencils and other tools should be cleaned with cold water immediately after use. After the painted fabric has dried, iron on the wrong side for approximately 3 minutes with a hot iron (use the proper setting for the particular fabric). This process sets the paint and the painted fabric will feel smooth and soft to the touch. To enjoy your creative work for a long time, we recommend washing at 30°C on delicate cycle (please wash fabric inside out).

Accidental spots of DEKA-PermMetallic - even if not heatset - cannot be removed.

Wonderful fabric projects can be created by choosing from the numerous types of paints in the DEKA fabric painting program. The classic DEKA-Permanent brightens up light-coloured fabrics and gives the painted pieces a pleasantly soft touch. The ultra opaque DEKA-PermDeck is ideal for dark-coloured fabrics ... it's super on jeans. DEKA-PermGlitter livens up T-shirts, jeans or fabric bags with a sparkly glitter effect. White clothing painted with DEKA-PermNeon shines in loud neon colours. DEKA-PermDisco glows in the dark.

DEKA paints and dyes have represented excellent quality in the hobby and craft field for more than 90 years. The reason this level has been maintained for so long can be attributed directly to intensive laboratory research. Thanks to our international experience and expertise, DEKA paints are always produced utilizing the newest standards in chemical technology. The careful choice of raw materials has allowed us to combine top quality with progressive environmental consciousness. More than 60 years ago, DEKA was considered a forerunner by creating waterbased paints for textiles

DEKA - The specialist in textile and hobby paints!
