DEKA-PermGlitter

Top Quality Glitter Paint for Fabric

DEKA-PermGlitter fabric paint for painting and printing fantastic glittering effects on light and dark fabric. With DEKA-PermGlitter you can decorate everything from T-shirts and sweatshirts to curtains. Virtually anything made of fabric can be made more colourful and sparkling.

Features:

Soft - opaque - nonfading - machine washable at 30°C, delicate cycle - exciting sparkling shades - shades are all mixable - and waterbased, of course!

Directions:

Stir DEKA-PermGlitter well before using. Be sure to wash or dry clean all fabric before painting to remove sizing, fabric softener, etc. In order to completely remove sizing, DEKA-TextilFit is recommended. Since the paint may go through the fabric, use a piece of cardboard as a backing (for example, when painting shirts, insert the cardboard between the front and back of the shirt). Using a soft brush, apply DEKA-PermGlitter generously on the fabric spreading the glitter particles evenly. Avoid applying several layers of the paint, since this reduces its washfastness. It is advisable to test and wash the paint on a sample of the intended fabric, since all fabrics have individual characteristics.

Brushes, stencils and other tools should be washed out with cold water immediately after use. After the painting has dried, the fabric should be ironed on the reverse side for approximately 3 minutes at a temperature suited to the fabric. This process sets the paint and leaves the painted fabric especially soft to the touch. To best maintain the glitter, wash at a delicate cycle up to 30°C with a detergent for fine clothes.

Accidental spots of DEKA-PermGlitter (even if not heatset) are permanent and cannot be removed.

Wonderful fabric projects can be created using any of the paints in the DEKA fabric paint collection together with DEKA-PermGlitter. Be aware that each type of paint can only be mixed with other colours of the same type (i. e. DEKA-PermGlitter with DEKA-PermGlitter, but not DEKA-Permanent with DEKA-PermGlitter). However, DEKA fabric paints may be used side by side on your projects.

DEKA paints and dyes have represented excellent quality in the hobby and craft field for more than 90 years. The reason this level has been maintained for so long can be attributed directly to intensive laboratory research. Thanks to our international experience and expertise, DEKA paints are always produced utilizing the newest standards in chemical technology. The careful choice of raw materials has allowed us to combine top quality with progressive environmental consciousness. More than 60 years ago, DEKA was considered a forerunner by creating waterbased paints for textiles.

Packaging: 25 ml

24-07 Golden Yellow Glitter	24-49 Blue Glitter	24-82 Copper Glitter
