

Fashionable trends

Flashy bright neon paints

On T-shirts or as home decoration: take a chance with this young stylish trend. These colourful intensive neon paints make the look!

DEKA-PermNeon – 6 fresh and young shades for white cotton

DEKA-ColorNeon – the daring hobby paint in 6 shades for white and light-coloured materials

Fun & action straight: phosphorescent paints

This is not for sleepyheads. The night turns into day! Everything is glowing: T-shirts, caps and decoration ghosts.

DEKA-PermDisco – 5 fancy shades glow in the dark on fabrics.

DEKA-ColorDisco – glows in the dark on various objects. You can choose from 5 shades.

Professionals use neon and phosphorescent paints for stylish trends to attract attention. These special colours can be stimulated with light to interesting glowing effects.

DEKA-neon paints are activated with light, often UV-light, and shine immediately in luminous shades. This effect is also called fluorescence or fluorescent colours.

DEKA-disco paints load with light and glow in the dark for a certain time. Professionals call this effect phosphorescence or after-glow.

Application:

For fabrics:

DEKA-PermNeon and DEKA-PermDisco are suitable for painting and printing on white natural fabrics. You can create daring T-shirts for the discotheque, weird fancy-dresses for the midnight party or funny children's wear. Use fabrics free of sizing. In order to completely remove sizing DEKA-TextilFit is recommended. For fixing iron dried coat from reverse side for approximately 3 minutes (cotton setting). Both paint types are washable up to 60°C.

For objects:

DEKA-ColorNeon and DEKA-ColorDisco are ideal for painting on white and light-coloured objects of materials like: wood, paper, cardboard, clay, stone, glass and lots more. A beautiful mobile for the playroom, smart party decoration, shining stars for dreaming.

Characteristics of the paints: intensive bright colours, silky lustre, smooth surface, fast drying, easy to use. If necessary surfaces can be primed white. Ideally suited are DEKA-ColorMatt or DEKA-ColorLack.

The strongest glowing effect appears on white surfaces.

Clean surface with spirit. Avoid finger-prints (grease).

General instructions

Stir paint well. Apply generously and evenly. Clean brush with water and soap. The shades of one series are blendable with each other and can be thinned with up to 5% water. Avoid exposing colours to strong sunlight. Limited daylight fastness.

This leaflet was made with care and to the best of our knowledge. Considering the multitude of materials and application techniques we cannot give advice for each special case. Therefore we recommend to make application tests on unobtrusive spots or on rest materials.

Do you already know the unique relief paint DEKA-Fun? The shade Moonlight also glows in the dark!
